

# NDS-TS Player

## Outline:

NDS-TSP is a professional solution for playing Transport Stream files. It complies with various standards of digital television signal sources. It is also suitable for HD and SD digital television.

## Features:

- **Play Transport Stream format files from harddisk**
- **Maximum I/O data rates up to 108Mbps**
- **I/O interfaces include USB2.0 and DVB-ASI**
- **Support SDTV and HDTV**
- **Comply with DVB standard**
- **A summarized analyzing of the Transport Stream**

# NDS-TS Player

## Technical Specs:

|                               |  |
|-------------------------------|--|
| <b>Interfaces</b>             | INPUT: USB2.0  |
|                               | OUTPUT: DVB ASI , BNC  |
| <b>Packet Size</b>            | 188 bytes  |
| <b>System Configurations</b>  | OS: Windows 2000/XP Professional                             |
|                               | CPU: P4-2.0G   |
|                               | Memory: 256M DDR   |
|                               | Storage: 80G WD JB hard disk                                 |
| <b>Applications</b>           | Signal generator for developing DTV system and equipments    |
|                               | Signal source for manufacturing of DTV system and equipments |
|                               | Demo of DTV system and equipment                             |
| <b>Physical/Environmental</b> | Dimension: 160x114x33 (mm )                                  |
|                               | Weight: 0.5kg  |
|                               | Operating temperature: 0°C ~ +55°C                           |
|                               | Operating humidity: 10% ~ 80%                                |
